Deadline for manuscript
submissions:

1 December 2020

Message from the Guest Editors

Dear Colleagues,

Coal is recognized worldwide as an essential component of the energy mix required for modern lifestyles because it provides a widely distributed, secure, and reliable source of energy that is relatively easy to obtain. The long-term forecasts claim that coal will remain a major fuel in global energy systems, accounting for almost 40% of electricity generation. However, it is responsible for more than 40% of energy-related carbon dioxide emissions. Clean coal technology is expected to increase the efficiency of coal use for both energy and chemical production. In the context of the challenges associated with coal utilization, this Special Issue seeks to contribute to the Clean Utilization and Conversion Technology agenda through enhancing scientific and multi-disciplinary knowledge of this topic. We therefore invite papers on innovative technical developments, reviews, case studies, analytical works relevant to more sustainable coal-based systems. We invite all of you interested in coal research in relation to process optimization to deliver up-to-date knowledge for a broad audience besides coal users.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex, Scopus and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2019).
